

Region 14/ Cisco College Child Development Associate Degree

The classes in the program are typically offered one at a time on a five week schedule. During this five week schedule we will meet every other Saturday for three Saturdays. We will meet at the Region 14 South site. The courses generally meet from 9 am-5 pm. We will meet during the summer twice a week either during the day or in the evening depending on the cohort's preference and ability. Also, if you have to take Math that meets one night a week during the fall and spring semesters. We found this to be the most successful way for students to complete the math requirement.

Advantages of this program:

1. Weekend classes during the school year
2. You can enroll in 12 hours in a semester but focus on one course at a time
3. Region 14 location
4. You will save \$120(\$40 per semester hour) per course on tuition
5. Transferability of classes
