

CISCO COLLEGE

Dear Student,

Welcome to Cisco College. We are happy you have selected us to further your education. To ensure you are off to a strong start with your online course, we have information to share regarding resources and technology.

If you haven't already done so, obtain your **textbooks** and/or course materials. You can visit the [Cisco College Bookstore](#) online to view your instructor's required materials. Click on "Textbooks" in the top menu and follow the prompts for selecting the campus, term, and course. The bookstore can also be reached during Cisco College business hours at (325) 794-4451 (Abilene) or (254) 442-5138 (Cisco).

Each Cisco College student is automatically issued a Cisco College **Gmail** account. Please visit mail.google.com to log in. Your Gmail username and password will be the same as your Canvas credentials. If you have trouble accessing your Gmail account, contact IT at HelpDesk@cisco.edu.

Canvas is the online learning tool used at Cisco College. It is available at any time via the Internet and allows students and faculty to interact and access course information. See our [Canvas](#) webpage for information about logging in and common questions. The [Student Resources](#) webpage provides links to signing up for a Canvas Orientation course, tutorials, a success checklist for online students, and more. Additionally, within Canvas, there is a "Student Resources" icon in the Global Navigation menu with links to important services and resources, such as the library, tutoring center, and academic calendar.

If you should need help with Canvas during the term, please contact Canvas Help at (325) 794-4480 or CanvasHelp@cisco.edu during college business hours.

Thank you for registering at Cisco College. Best wishes for a successful term!
